Future Outlook

- Following the acquisition of NDCTech in July, the management of Systems and NdcTech have collaborated
 to integrate various support functions and teams of the two companies. The Company is working to
 strengthen the relationship with Temenos and financial sector technology partners in the relevant
 markets. The Company is also aligning a vertical strategy to cross sell and upsell to the existing core
 banking customers and vice versa.
- The GCC region has not been impacted by inflation and economic slowdown and there is sustained demand and growth in the region. UAE subsidiary has become a key contributor to the business as the Company has signed key strategic accounts with a diversified portfolio and growth opportunities that are expected to provide the Company with recurring revenue for future growth. Systems Arabia has also secured multi-year contracts with Saudi businesses and is fully aligned with Saudi Vision 2030 from the technology and digitization perspective. The Company envisages opportunities for the Company to grow in the financial, telecommunications, and public sector entities of KSA, which has been the core strength of its sevice offerings.
- In the US market, the high margin Mortgage business which was a major contributor to BPO revenue in the past, has seen a constant decline over the past year owing to the increase in interest rates. However, the Company has been able to successfully absorb the impact of this challenge through increased focus on the IT business. In line with Company's strategy to focus more on IT consulting in all markets with the US and Europe at the forefront, the Company expects this growth to continue due to the relevance of the various service domains and technology stack the Company is targeting.
- The Company is locking most of its domestic contracts in USD, thereby increasing dollar based revenue for the company and hedging the foreign currency risk.

- To sustain the hyper-growth mode, the Company is investing and hiring resources proactively and striving towards a future-ready pool of resources by training, re-skilling, and upskilling of the existing resource pool. The Company has hired over 300 software engineers in this quarter and is aggressively working on the training and development of resources to fuel future growth and have a cost-effective HR pool. Various training programs that the Company initiated at the start of the year like IT Mustaqbil and TechLift, are on track to create the pipeline for its growing need for human resource. The Company has also developed stronger academia linkages to ensure that the curriculum is in line with the market requirements and produces employable talent ready to enter the market.
- With the strategic collaboration with Sarmayacar and Sharooq Partners, E-Processing Systems (EPS) is
 deepening its penetration of the micro-retailer base. The new product offering with the EMI License, is on
 the verge of launch. EP Systems management team is growing and it has the support of a Fintech
 conversant board and advisors. Their expertise will not only help fine tune the business strategy but will
 also take the business to the next level.
- The Company's other associate, Jugnu launched its Buy Now, Pay Later (BNPL) solution for SME retailers
 earlier this year after securing \$22.5 million of funding in series-A from SARY (MENA-based B2B
 e-commerce giant). The business of Jugnu is firmly on a growth trajectory with best in class unit economics
 in their type of business.

19. Fair value hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable either, directly or indirectly.

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.
